

HERE TO HELP YOU

IASME is committed to helping businesses improve their **cyber security, risk management** and **good governance** through an **effective and accessible range of certifications**.

The IASME Consortium delivers a range of **quality, effective and accessible** certifications across **cyber security, information assurance** and **counter fraud**.

Cyber Essentials - A Government backed scheme focusing on five core technical controls designed to protect organisations against the most common cyber-threats. Certification will reassure customers, unlock business opportunities and assists with the legal requirements of Data Protection legislation.

IASME Governance - An affordable and accessible alternative to ISO 27001 that includes a Cyber Essentials assessment and demonstrates achievement against the requirements of GDPR.

IoT Security Assured - A certification scheme for internet connected devices to reassure customers that the most important security controls are in place and demonstrate alignment with upcoming UK legislation and European standards.

Counter Fraud Fundamentals - A scheme developed in partnership with the Open Banking Implementation Entity to certify organisations of all sizes against the most important counter fraud controls.

WORK WITH IASME

Our **free guidance packages** will ensure your clients are kept up to date and receive support and guidance towards achieving these valuable certifications.

Our package offers:

- Awareness of the benefits that certification can bring to their organisation:

- ✓ Proven protection from verified controls.
- ✓ Readiness for tender opportunities
- ✓ Supports compliance with the security requirements of **Data Protection** legislation.

Access to the **free Cyber Essentials**

- **Readiness Tool** to help in taking the first steps towards essential cyber security.
- **Co-branded briefing sheet** giving an overview of all of our schemes and the controls required.
- **Regular updates** via newsletters or blogs.
- **Dedicated account manager.**
- **Co-branded social media posts.**
- **Security tip of the month.**
